

Avanti 65 Conventional Flue

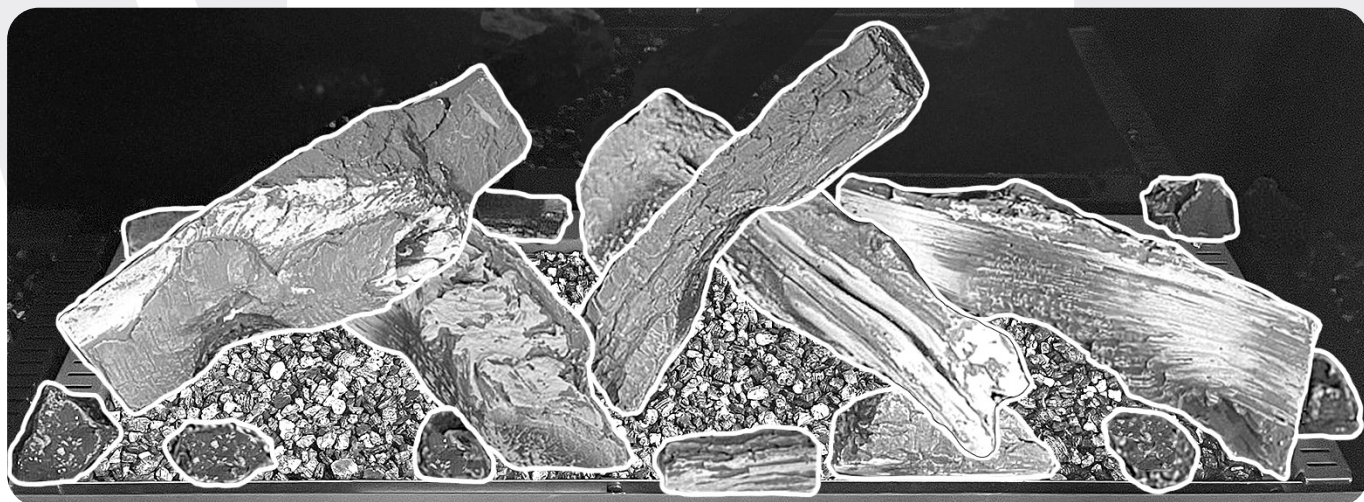

LOGS

EMBERS

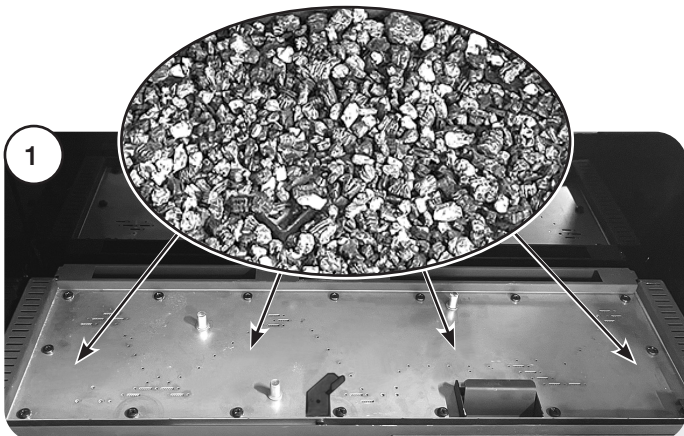

COMPLETE SET

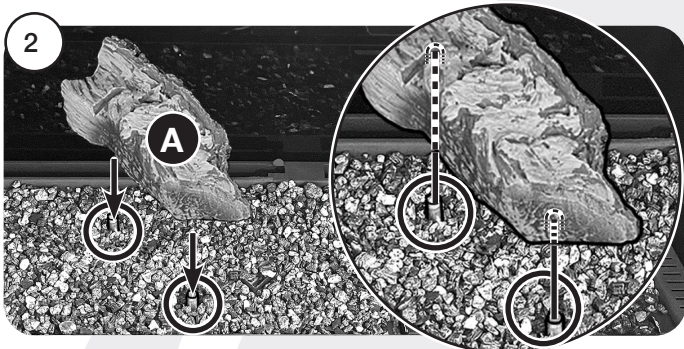

LOG LAYOUT INSTRUCTIONS

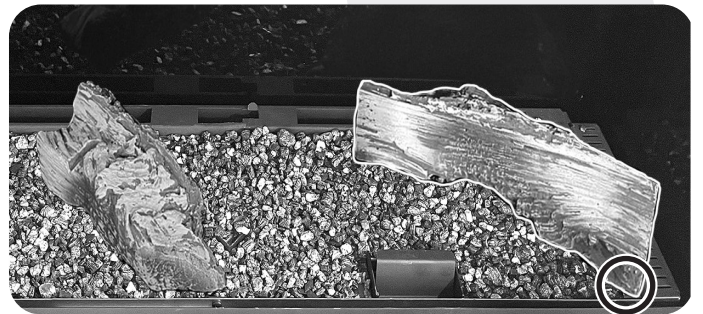

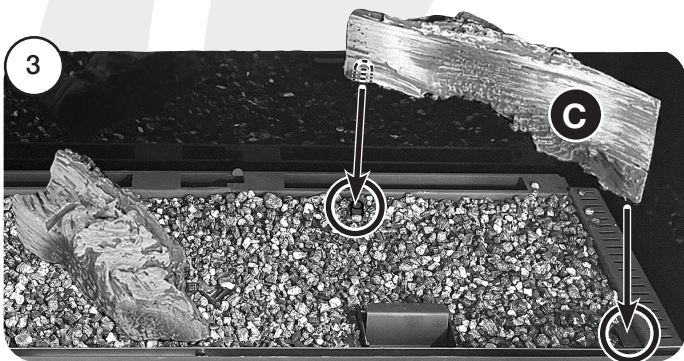

Use all the vermiculite to fill the burner tray and spread evenly across the whole burner.

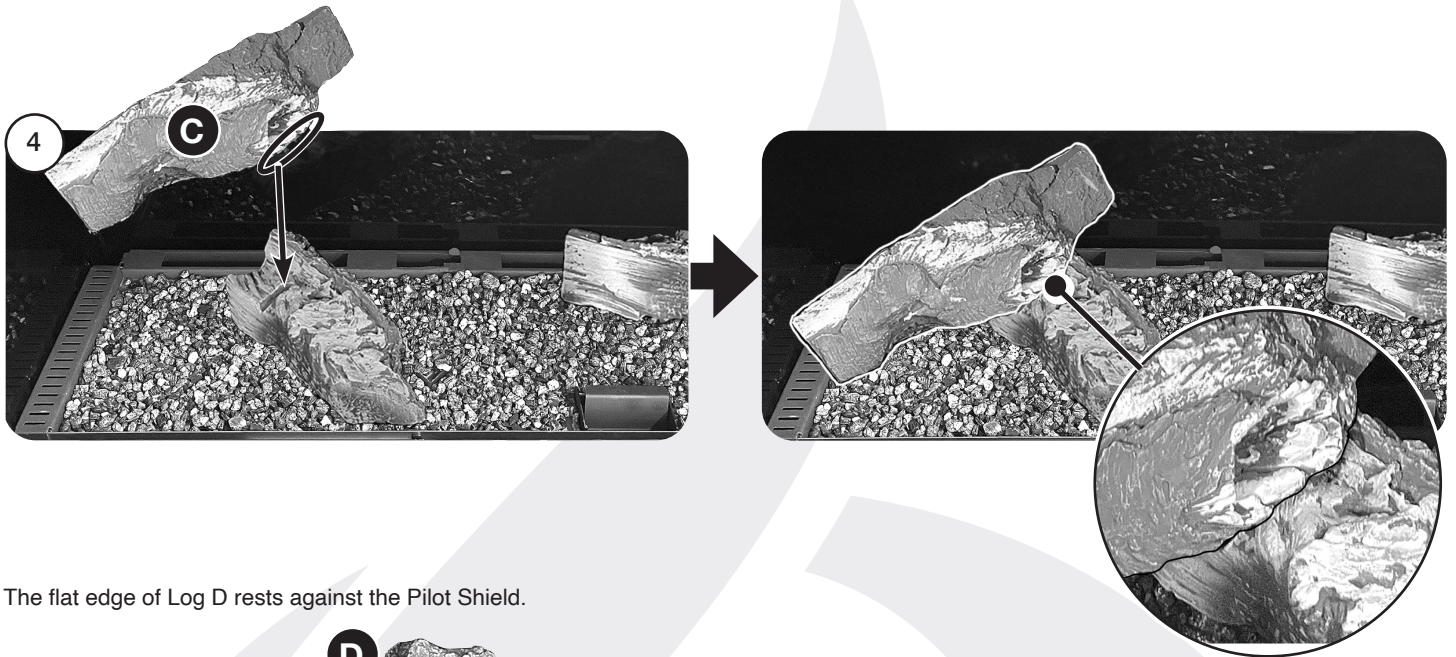

Place Log A in position on the 2 locating pins.

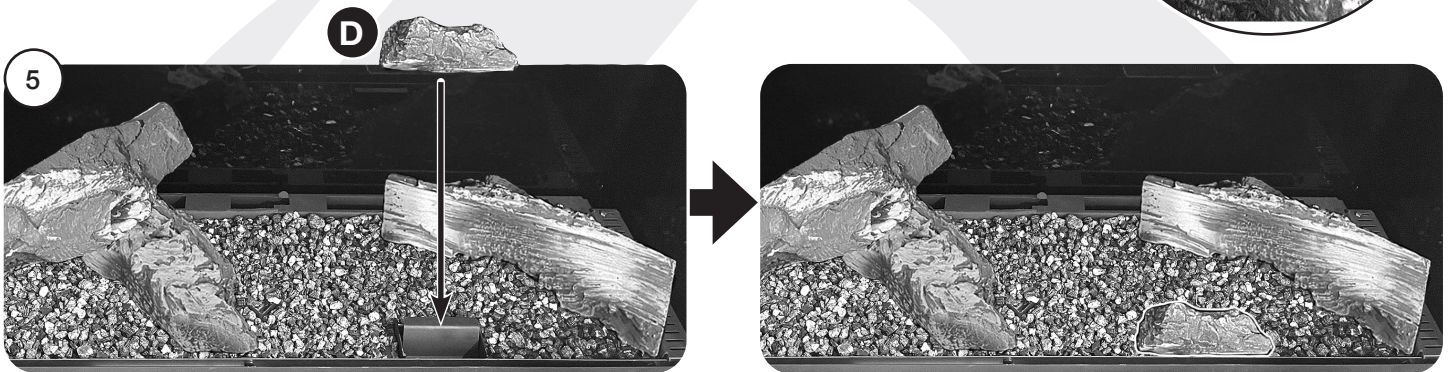

Log C is positioned on the right hand locating pin and rests against the edge of the front tray.

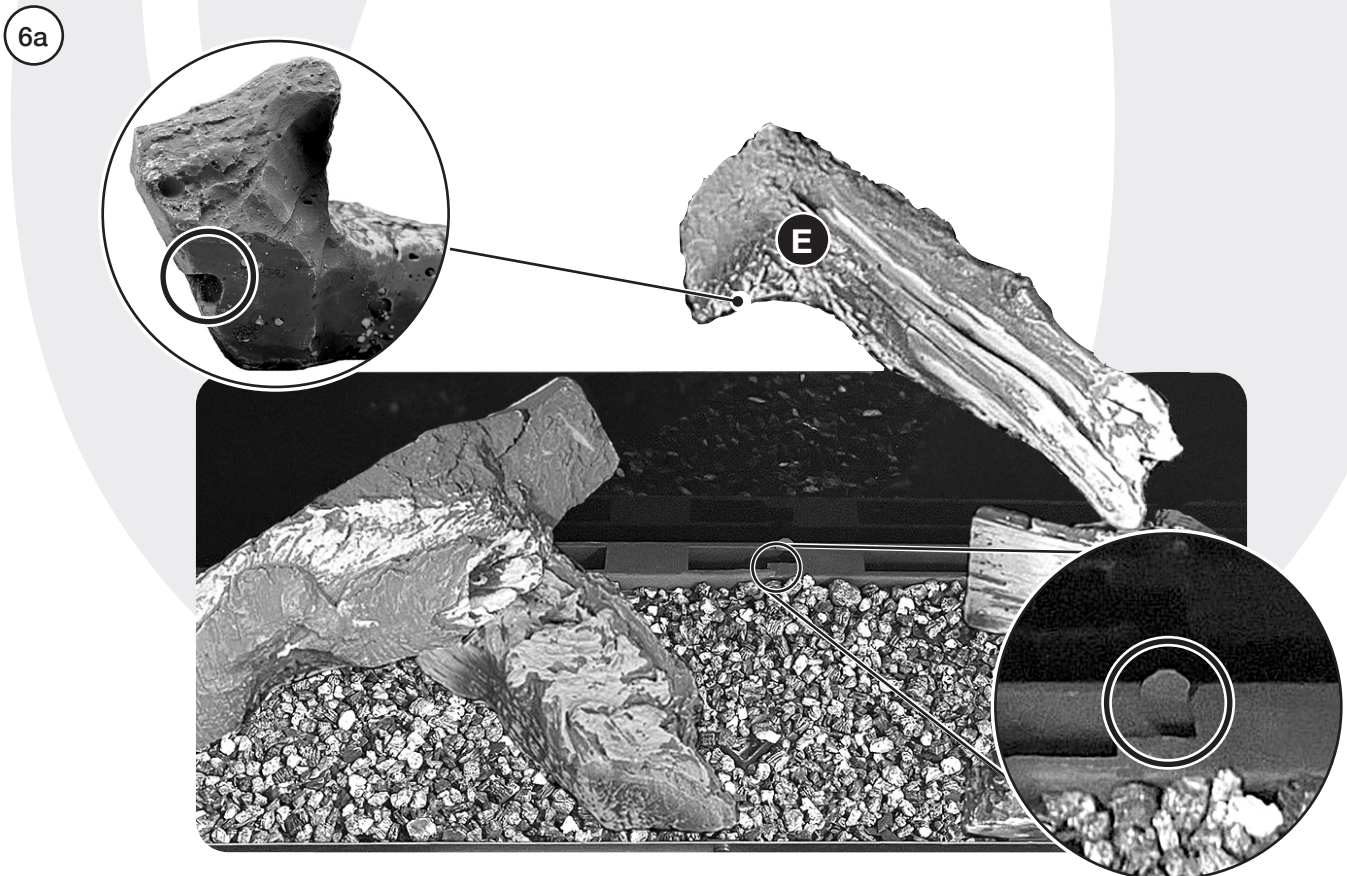

Place the protruding edge on Log C into the groove on Log A, as shown in diagram 4.

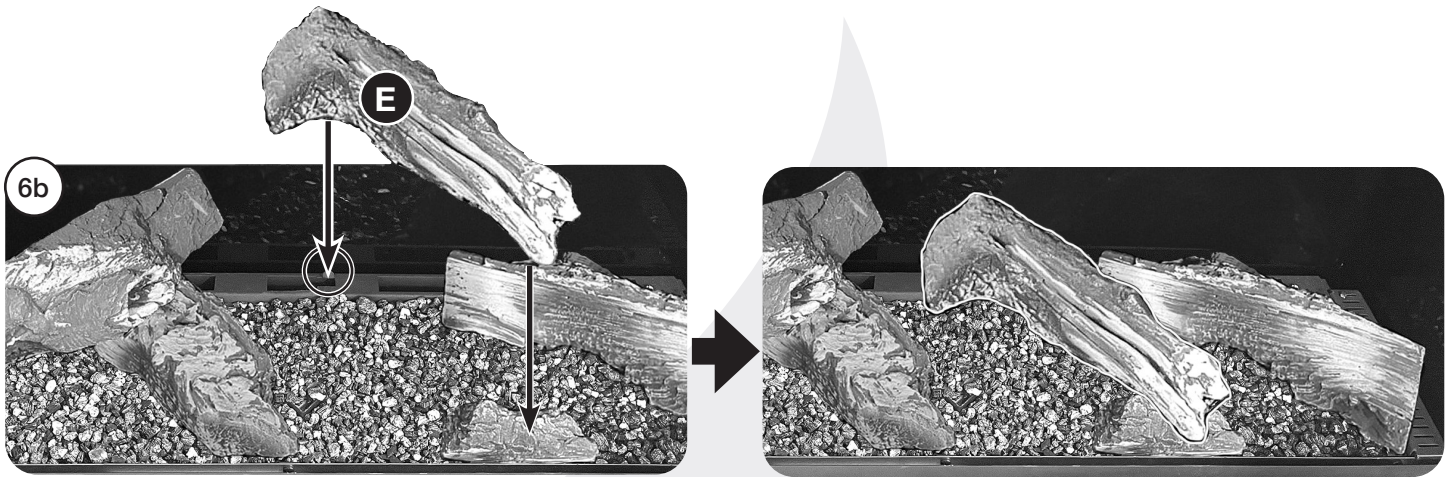

The flat edge of Log D rests against the Pilot Shield.

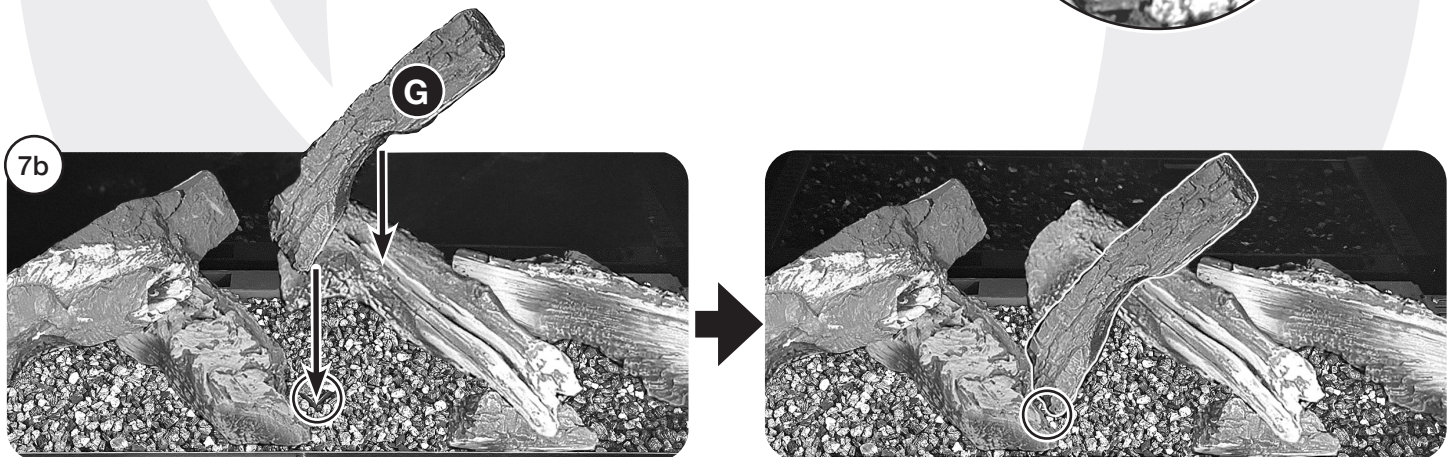

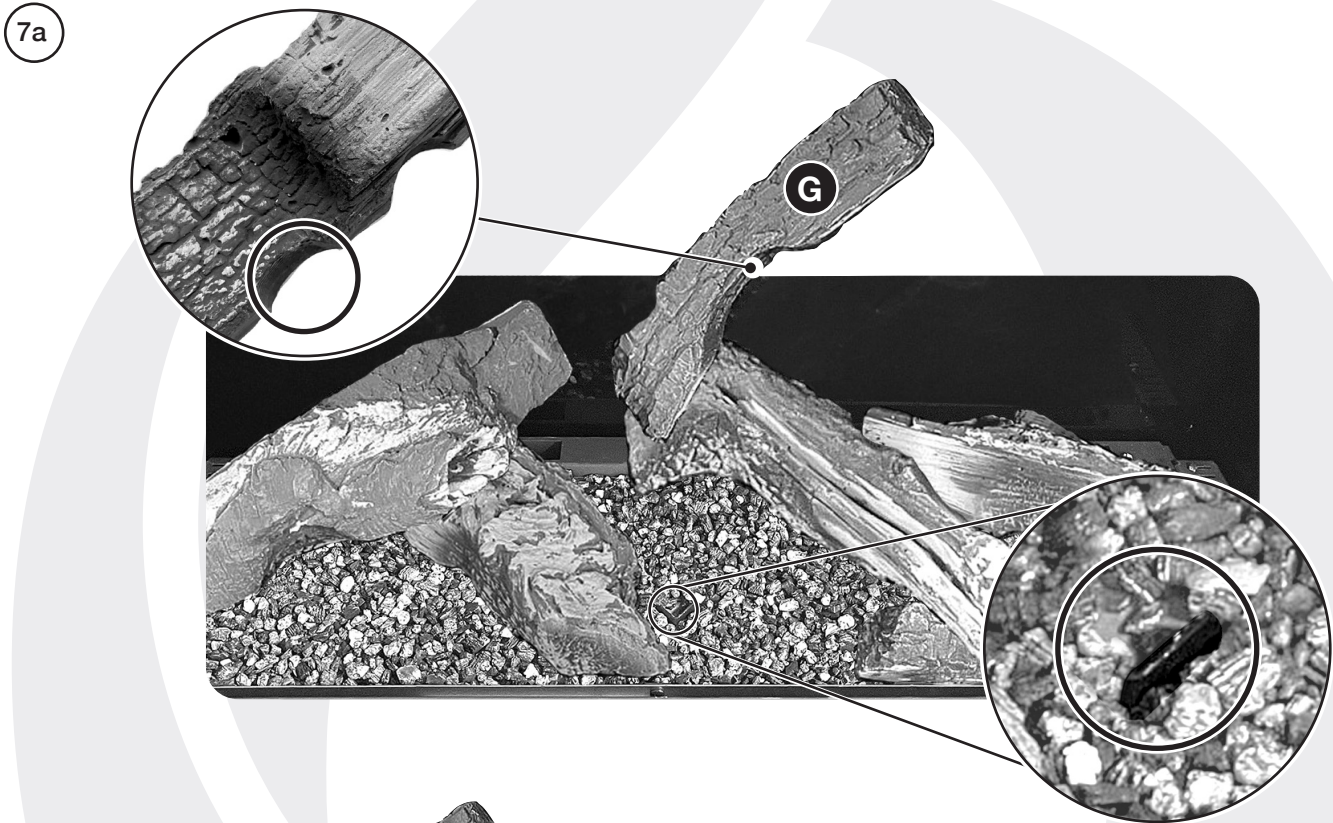

Fit the tab on the rear trim onto the cutout on the left end of the Log E. The right end rests on Log D, see diagrams 6a & 6b.

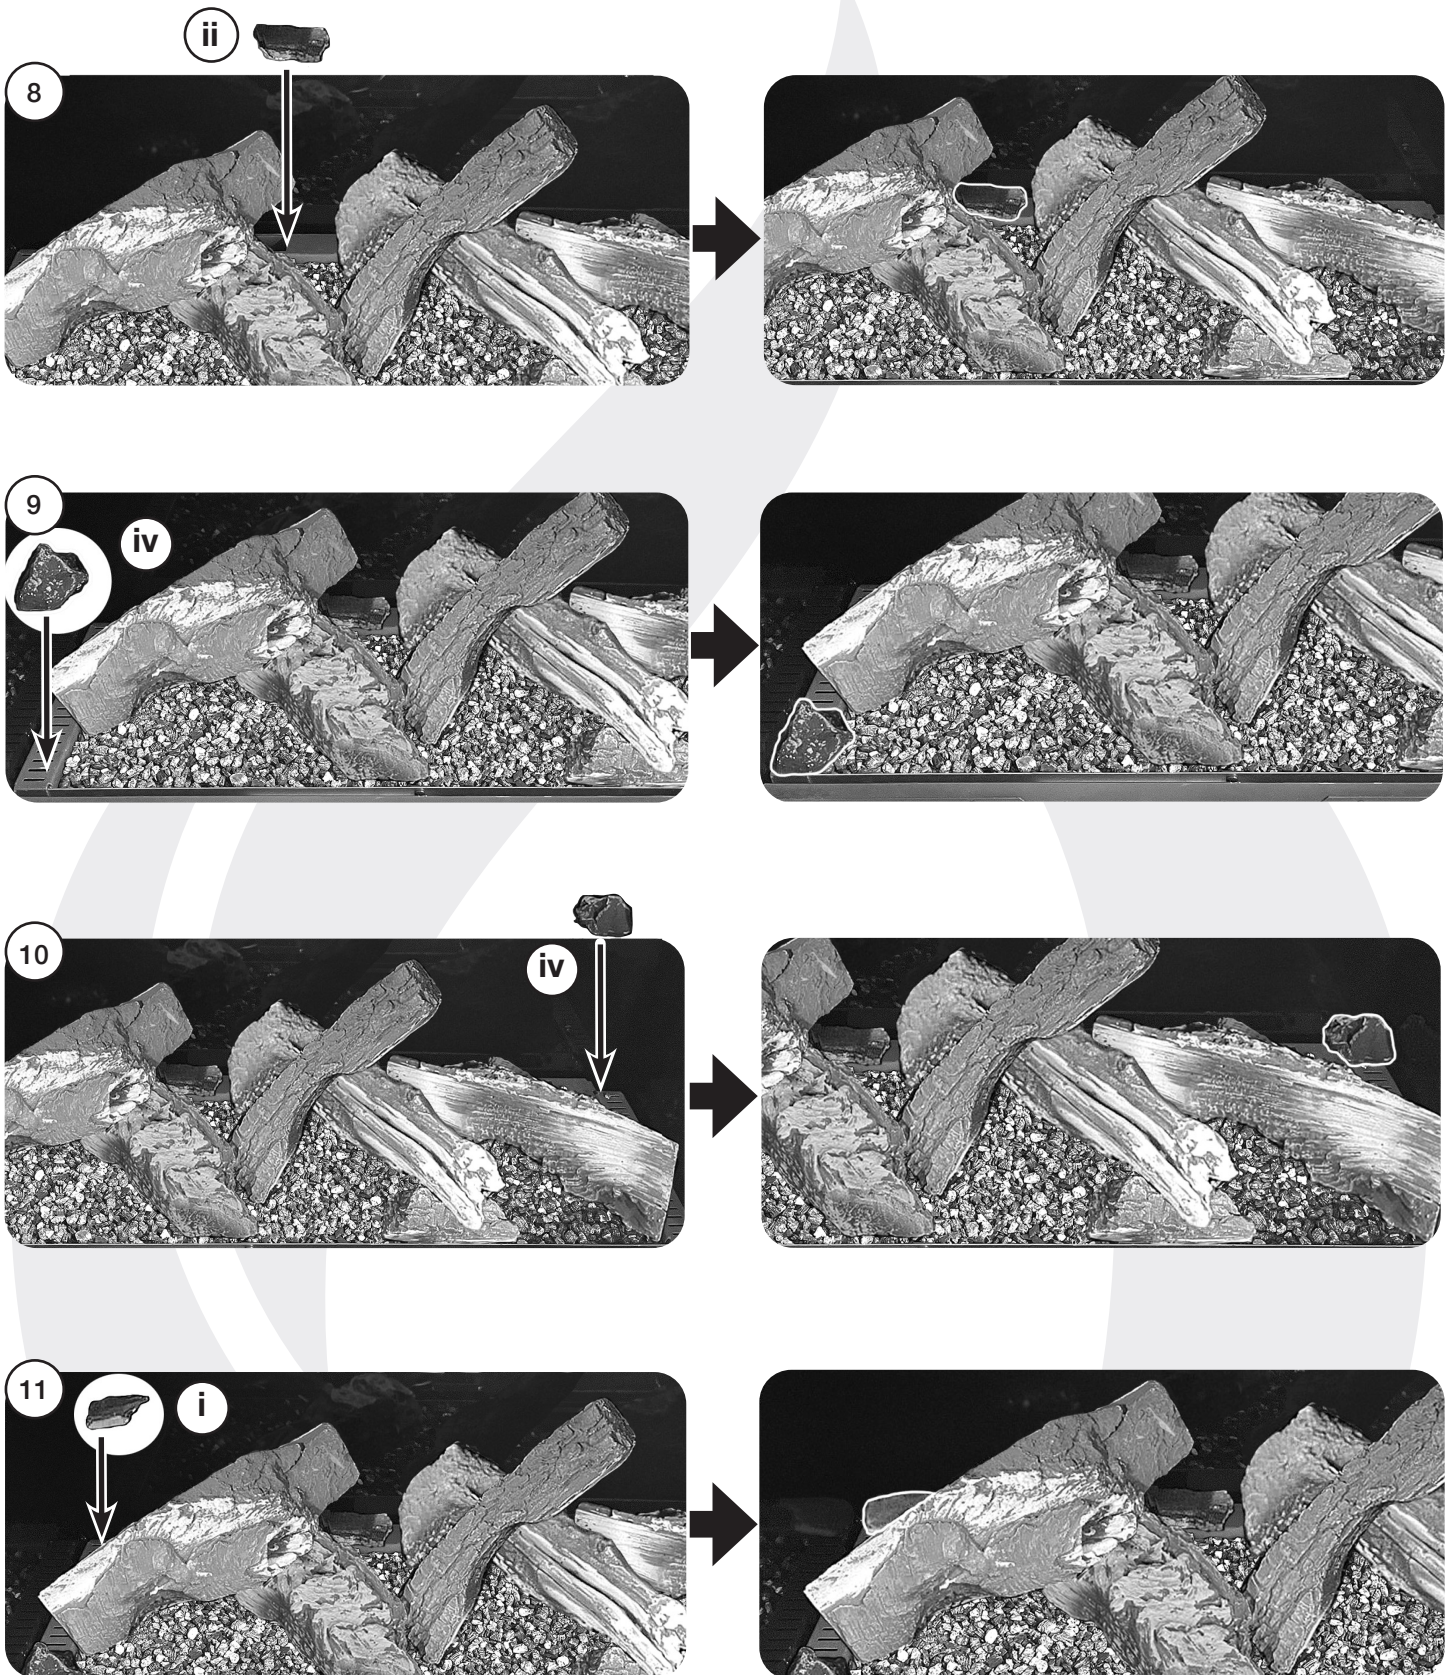

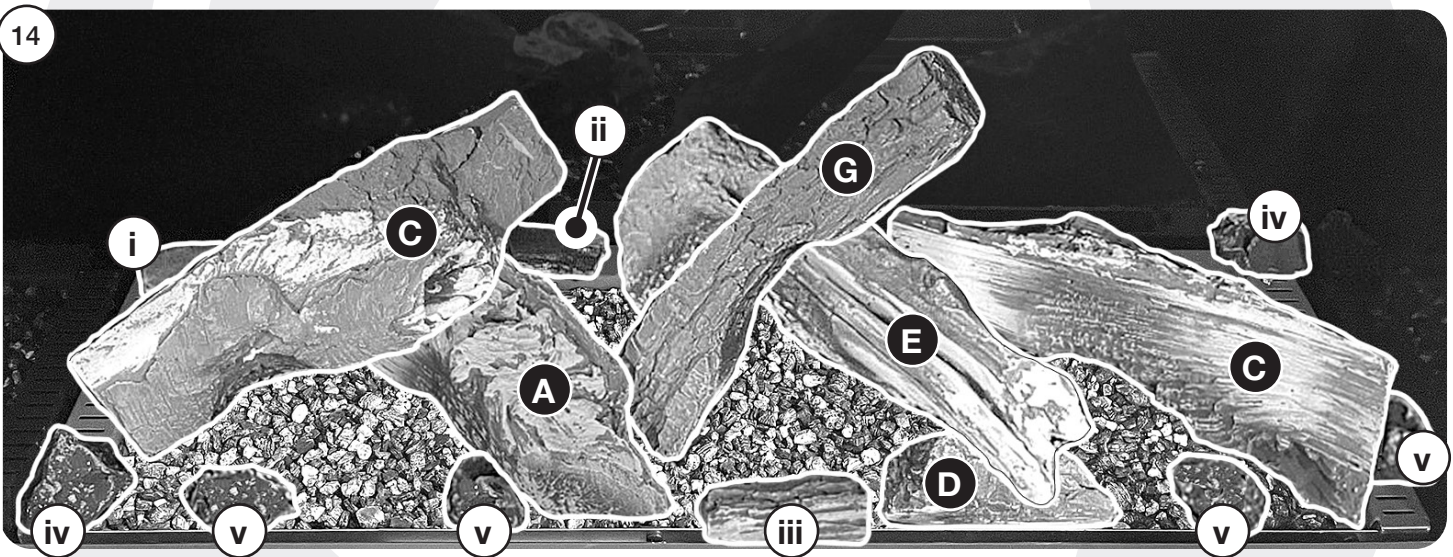

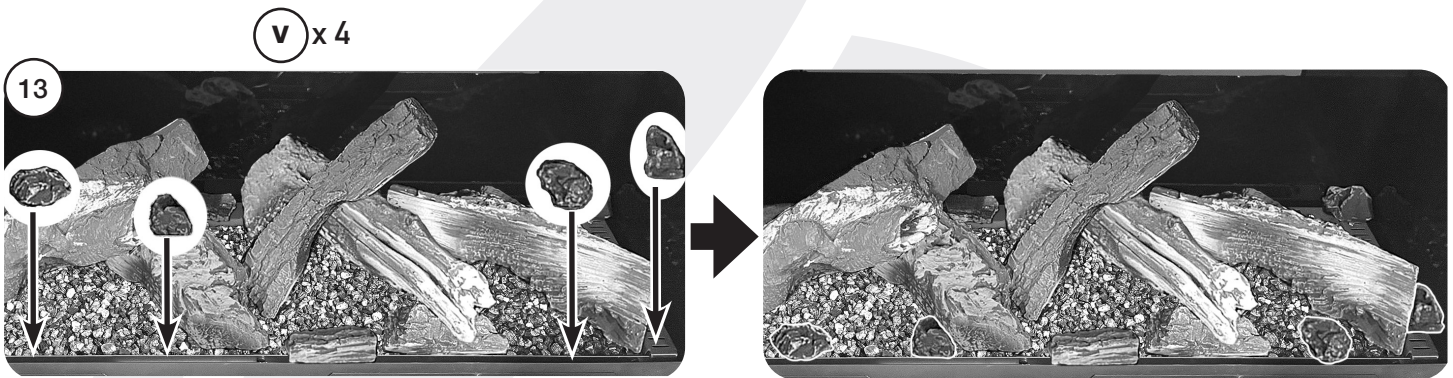

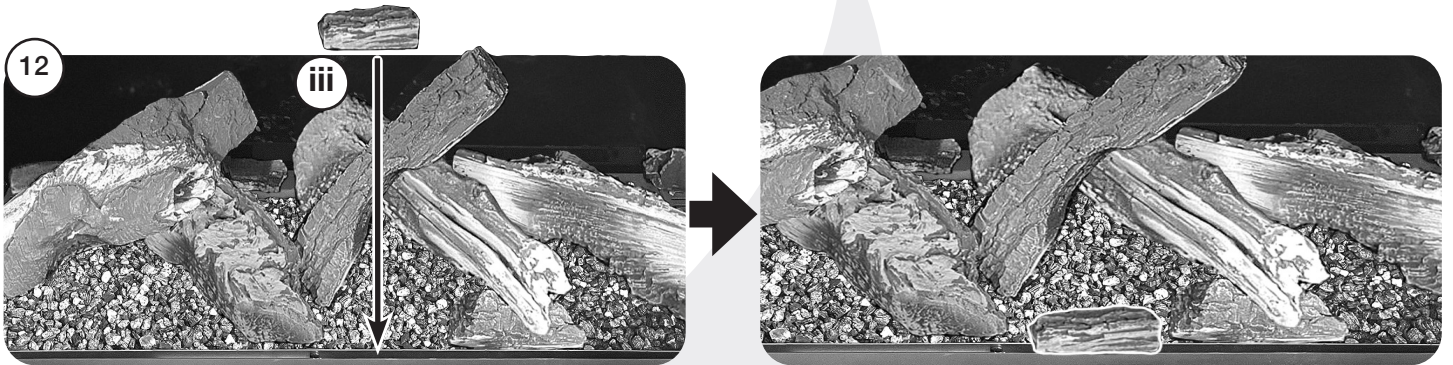

Place the cutout of Log G on top of Log E, with the left end resting on the bracket, in the position shown in diagrams 7a & 7b.

Ember ii is positioned at the rear of the burner tray and rests on the rear trim.

Ember iii sits on the front edge of the Burner Tray.

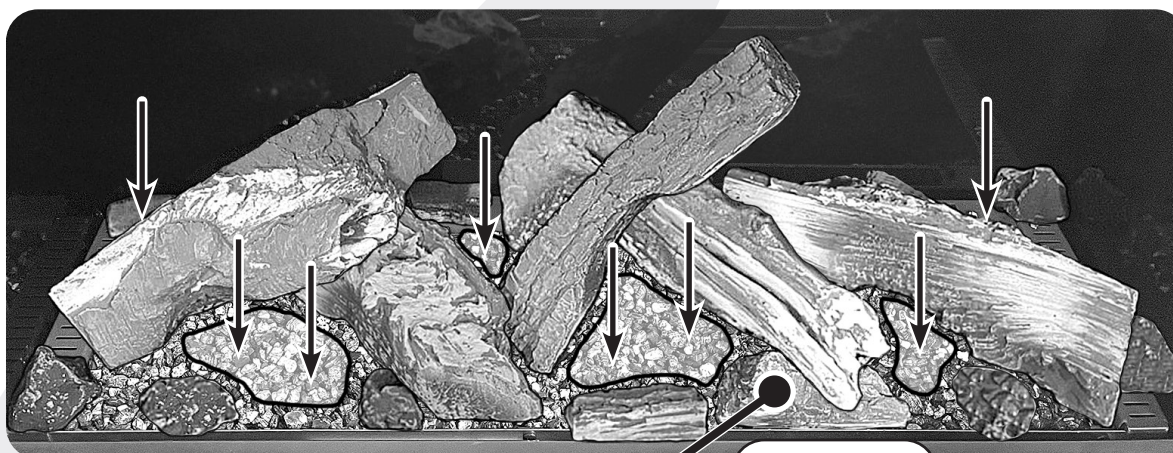

Embaglow

WARNING- DO NOT PLACE NEAR THE PILOT AREA.

Do not place Embaglow in the area around the pilot burner - see highlighted example on diagram as this may effect the ignition process and flame picture.

Pilot Area

IT MAY NOT BE NECESSARY TO USE ALL THE EMBAGLOW IN THIS PACK.

Sparingly spread an amount of the fibres provided on the sections highlighted in the instructions. Take care not to use more than specified in the instructions.
